Research-related technology (pre)releases

NWymC — Corpus of New Wymysorys

This is a corpus infrastructure for storage and management of Wymysorys textual data. It has basic search and dump functionalities for use in language pedagogy and research as well as an annotation interface for community engagement with texts. Currently at initial stages of deployment at ispan.waw.pl/nеспomila/wymysorys-korpus/ – Production bugs are being addressed and it is envisioned that the corpus will be populated with an initial round of texts in site in early November 2022.

MoReDaT — Modular Remote Data Collection Toolkit

A set of Django templates for unsupervised, remote spoken-language data collection. <https://github.com/BobBorges/moredat>

Open Ancestry Web

A Django template for private genealogy collaboration. Open source release sometime in 2022/2023.

RASPARQ

A Python script for scraping whole collections of genealogy-related archives from tombo.pt and related Portuguese municipal archival collections on the web. <https://github.com/BobBorges/rasparq>

E_Karttunen

This is a GUI application for F. Karttunen's 1992 *Analytical Dictionary of Nahuatl*
https://github.com/BobBorges/E_Karttunen

ELAN-Floyd merge

This is a Python program to perform end-to-end merge two or more Elan projects with identical tier structure.
https://github.com/BobBorges/ELAN_floyd-merge

Europarl Speech Recognition pipe

This is a program (Bash and Python) that automates processing of mp4 recordings of sessions from the EU parliament. It (a) extracts embedded audio track (one per EU language), (b) chunks audio tracks by utterances, (c) recognizes whether each audio chunk is natural speech or a simultaneous translation, (d) processes each chunk with Speech to Text software (supported languages, all but Maltese = 19/20), and (e) populates an Elan (.eaf) document with a set of tiers for each language – transcription with time-aligned utterance chunks, SR confidence score per chunk, and 'is translation' bool per chunk.

https://github.com/BobBorges/Europarl_sr-pipe (private repo, but the corpus as a resource will be made available following a short description to be published in 2022 or early 2023)

Nahuatl NLP

Beta version. Python module for analysis of Nahuatl textual data. Tokenize, parse morphology, gloss, POS-tag.
https://github.com/BobBorges/Nahuatl_NLP (private repo)

Speech Recognition pipe

This is a set of programs (Bash and Python) that will (a) chunk by utterance, and (b) speech recognize chunks of a media file given a specified language. The output is populated into a time aligned (by chunk) Elan (.eaf) file.
https://github.com/BobBorges/SR_pipe (private repo)

Short wav to Elan

This is a set of bash scripts for efficiently managing audio data that need to be available to Elan in customary nested folder structure, and for other purposes that require non-nested structures. Nest, de-nest files; automated creation of .eaf documents; extract annotations to txt, populate annotations from txt.
https://github.com/BobBorges/Short-wav_to_elan

Wymysorys Pro Keyboard layout for Linux

This is a Linux-friendly keyboard layout for writing in the Wymysorys language
https://github.com/BobBorges/Wymysorys_pro_KB

Wymysorys Pro Keyboard layout for MacOS

This is a MacOS-friendly keyboard layout for writing in the Wymysorys language
